Assignment-3

Assignment Date	2 October. 2022
Student Name	Pradumna
Student Roll Number	2019504043
Maximum Marks	2 Marks

Question :

Write a python code for Blinking LED for raspberry pi.

Solution:

```
import RPi.GPIO as GPIO     # Import Raspberry Pi GPIO library
from time import sleep      # Import the sleep function from the time module
GPIO.setwarnings(False)     # Ignore warning for now
GPIO.setmode(GPIO.BOARD # Use physical pin numbering
GPIO.setup(8, GPIO.OUT, initial=GPIO.LOW) # Set pin 8 to be an output pin and
set initial value to low (off)
while True:                 # Run forever
    GPIO.output(8, GPIO.HIGH)   # Turn on
    sleep(1)                # Sleep for 1 second
    GPIO.output(8, GPIO.LOW)    # Turn off
    Sleep(1)                # Sleep for 1 second
```

File Edit Format Run Options Window Help

```
import RPi.GPIO as GPIO                  # Import Raspberry Pi GPIO library
from time import sleep                   # Import the sleep function from the time module
GPIO.setwarnings(False)                  # Ignore warning for now
GPIO.setmode(GPIO.BOARD)                 # Use physical pin numbering
GPIO.setup(8, GPIO.OUT, initial=GPIO.LOW) # Set pin 8 to be an output pin and set initial value to low (off)
while True:                              # Run forever
    GPIO.output(8, GPIO.HIGH)            # Turn on
    sleep(1)                             # Sleep for 1 second
    GPIO.output(8, GPIO.LOW)             # Turn off
    sleep(1)                             # Sleep for 1 second
```

Question :

Write a python code for Traffic lights for Raspberry pi.

Solution:

```
from gpiozero import Button, TrafficLights #Import button and traffic lights from
gpio python library
from time import sleep          #Import the sleep function from the time module
button = Button(21)      #Button-GPIO 21
lights = TrafficLights(25, 8, 7)                #Red LED-GPIO 25,Amber LED-GPIO
8,Green LED-GPIO 7
while True: #Run forever
        button.wait_for_press() #Wait for the button to be pressed
        lights.green.on()        #Turn on Green LED for 90 seconds
        sleep(90)
        lights.amber.on()        #Turn on Amber LED for 10 seconds
        sleep(10)
        lights.red.on()    #Turn on Red LED for 45 seconds
        sleep(45)
        lights.red.on()    #Turn on Red and Amber for 10 seconds
        lights.amber.on()
        sleep(10)
```

```
